

Advanced Course for testXpert II or testXpert III

This training course is designed for operators of ZwickRoell materials testing machines, in particular for advanced users with prior knowledge of testXpert II or testXpert III testing software.

Course Objectives

- Use of advanced functions and elements of the testing software
- Unaided creation of advanced test sequences with complex results using Master Test Programs

Course Content

- Review of the basics
- Generating complex test sequences via the advanced wizard
- Generating complex results
- Creating parameters and dialogs
- Advanced protocol generation
- Working with correction curves
- Using organization data
- Integrating external devices
- Course exercises based on set examples

Note

The practical exercises in the Advanced Course are material-independent and are based on Standard Test Programs for a static materials testing machine

Duration

2 days (on both days from 8:30 to 16:30)

Location

In addition to our headquarters in Ulm, the ZwickRoell Academy also offers this training course at many other locations. An overview of all training locations and dates can be found online in our training calendar

Price

- ZwickRoell Academy in Ulm: 1.130 Euro
- Other training course locations: 1.370 Euro
- Switzerland: 1.580 Euro

The training course cost includes the fee for the training and all course materials, as well as lunch and refreshments daily. For your professional development and qualification, we provide you with a personal certificate to certify the scope of the training course and learning content
