ZwickRoell Academy

Basic Course for testXpert II or testXpert III

This training course is designed for operators of ZwickRoell materials testing machines, in particular for beginners with little or no prior knowledge of testXpert II or testXpert III testing software.

Course Objectives	▪ Basic knowledge of the software ▪ Setting up the machine to perform tests while using the safety device correctly ▪ Unaided generation of test sequences for performing standardized tests
Course Content	▪ Overview of the test program structure and user interface of the test software ▪ Explanation of the testing system and explanation of the ZwickRoell test environment concept ▪ Performing a test ▪ Understanding and formatting test results ▪ Test-result archiving options ▪ User interface and screen layout ▪ Creating a simple test report ▪ Setting up and applying user management ▪ Course exercises based on set examples
Note	The practical exercises in the Basic Course are material-independent and are based on Standard Test Programs for a static materials testing machine
Duration	2 days (on both days from 8:30 to 16:30)
Location	In addition to our headquarters in Ulm, the ZwickRoell Academy also offers this training course at many other locations. An overview of all training locations and dates can be found online in our training calendar
Price	▪ ZwickRoell Academy in Ulm: 1.130 Euro ▪ Other training course locations: 1.370 Euro ▪ Switzerland: 1.580 Euro The training course cost includes the fee for the training and all course materials, as well as lunch and refreshments daily. For your professional development and qualification, we provide you with a personal certificate to certify the scope of the training course and learning content
