

Marko Pucelj, ZwickRoell GmbH & Co. KG

Marko Pucelj started his vocational training at ZwickRoell as a communications electronics technician in 2001.

Immediately after his training, he continued his education to become a state-certified technician.

In 2007, Mr. Pucelj moved to the After Sales division where he was responsible for repairs of the dynamic controllers K7500 and HydroWin. At the same time, he was involved in the development of the new Control Cube servo controller.

In 2011, Mr. Pucelj moved to the sales department for customized solutions, where he currently serves as sales engineer responsible for modernizations of dynamic testing machines and testing systems. Marko Pucelj has been focused on the field of dynamic testing at ZwickRoell since 2005.
