

Mr. Dr. David Frómeta
Eurecat

Career:

PhD in Materials Science and Engineering, 2021.

MSc in materials science and engineering, 2016.

My research is focused on the formability and fracture characterization of sheet metal and the study of the relationship microstructure-mechanical properties, with special focus on fracture mechanics testing of high strength metal sheets and lightweight sheet materials.

Current employment:

Researcher, Head of Mechanical behaviour research line at the Unit of Metallic and Ceramic Materials of Eurecat.
