

Abstract:

testXpert Analytics - Benefit from the data analysis of the future

ZwickRoell GmbH & Co. KG, Isabelle Mang, Daniel Kreutzer, Valentin Herter

testXpert Analytics is the basis for the data analysis of the future. Analyze your test and machine data efficiently and securely at any time with prepared visualizations. All data can be easily accessed from any of your workstations. This means that long-term evaluations, comprehensive test reports, and a complete overview of all existing machines and their operating condition are possible at any time. testXpert Analytics includes:

- Condition Monitoring
- Fatigue Data Evaluation
- Test Data Management
- Trend Analysis
