

Dr. Caroline Peskoller

Vetter Pharma-Fertigung GmbH & Co. KG

Caroline has a background in chemistry with a PhD in analytical chemistry. She has 10+ years of experience in the pharmaceutical industry. After joining Vetter in 2016, she began in the quality control department for packaging materials and was responsible for the implementation and validation of functional test methods. Since 2018 she is working in the development service as a project manager with the focus on test method development for different injectable delivery devices and customer projects.
