

Dr. Hannes Körber
ZwickRoell GmbH & Co. KG

Dr. Hannes Körber received a degree in aerospace engineering from the University of Stuttgart in 2006.

He then joined Boeing Hawker de Havilland in Melbourne, Australia, where he worked as test engineer on the “787 movable trailing edge data allowables test program” and gained substantial experience in static material characterization of composite materials.

In 2007, Dr. Körber pursued his academic education at the University of Porto, Portugal, where he received a PhD on the topic “mechanical response of advanced composites under high strain rates” in 2010.

From 2010 until 2018, Dr. Körber was group leader of the research group “material behavior and testing” at the Chair of Carbon Composites at the Technical University of Munich. Apart from the supervision of researchers in this field and teaching, Dr. Körber was also responsible for the specification and installation of the mechanical testing laboratory.

In 2019, Dr. Körber joined ZwickRoell, where in his role as industry manager for composites and cross topic industry manager for public authorities, he is responsible for market monitoring, product development and sales support.

Dr. Körber is also a member of DIN and ISO standard committees for mechanical testing of composite materials.
