

Product Information

Ball burst test device

CTA: 45102 45101

Ball burst test device

For tests to ASTM D3787-88, ISO 3303 Method A and ISO 9073-5

- **Specimen material:**
plastic films, rubber or plastic-coated fabrics

Ball burst test device

Advantages and features

- Fast, easy, reliable insertion of film strips

Product Information

Ball burst test device

Technical data

Type Item No.	Ball burst test device 316233	
Test load (F_{max})	10	kN
Compression die:		
Length with ball	148.5	mm
Ball diameter	Ø 25.4	mm
	Ø 1	"
Indentation depth, max.	104	mm
Ball burst unit:		
Diameter	280	mm
Ring clamp	Ø 44.45	mm
	Ø 1.75	"
Maximum specimen width	125	mm
Ambient temperature	+10 to +35	°C
Weight, approx.	11.3	kg
Upper connection	Adapter, 16g6	
Connection, below	Connector, bolt circle 75 mm	
Included in delivery	Spherical compression die, specimen holder with clamping device
